

What is Harmony?

Dictionary definition: wholeness, fullness of who you are; spirit, soul and body in harmony; peace, rest, knowing, destiny.

Harmony relates very closely to identity. When our spirits come alive and are connected to God we begin to resonate with our true identity. The Greek root for harmony is 'harmos', meaning a joint, a place of connection.

Everything that exists is vibrating at a certain frequency. When God said "Let there be light" He also released a sound and energy that is surrounding us and holding everything together and which has been vibrating through and outside space and time since that first utterance.

We desire to align ourselves with the sound and frequencies of Heaven – to resonate with them and be in tune with them. When we carry this sound within us we can then release it into the world.

Harmony is aligning yourself with the destiny and the plan that God has for you and resonating with the truths of who you have been called to be.

Seven Mountains of Harmony

The Harmony Mountain resonates with the Man (Priestly) face of God.
