

Taking back what belongs to us

Waltraut Reimer

I personally had absolutely no idea of quantum physics, I was not even interested in normal physics. But when I listened for the very first time to details about sound, light energy and frequencies and their effects, I noticed that my spirit was almost "dancing" inside me. Since then that has happened every time when I listen to these topics. Even though I am not at all an expert in these things, I have understood this much: classical physics is the macro-scale physics. It deals with the nature and properties of matter and energy (e.g. gravity, light velocity, etc.). Quantum physics is the physics of very, very small particles.

All matter, all cells consist of molecules - molecules consist of atoms - atoms in turn consist of subatomic particles (protons, neutrons, electrons, quarks etc.) Even these subatomic particles consist again ... yes, of what? They can no longer be called particles, it is simply energy that vibrates constantly. These micro-particles exist as substance (matter) as well as invisible waves of energy). Energy is described as light and power. Light is described as energy and power.

Those things have helped me to understand many Bible verses in a much deeper way:

- God is **light**
- Jesus: I am the **light** of the world
- You are the **light** of the world.
- Isaiah 60:1: Arise and shine, your **light** has come

I understand it this way: If God is light, then He is power and energy. We as His children are also light, which does not only mean we act in a certain way, as I used to think. I now believe that as God's children we also are power and energy that still has to be released in us to become effective. But one day the light in us will literally shine, our body will shine with the glory of God if we allow Him to totally transform us into the person He originally created us to be.

Scientists have discovered that the laws of classical physics do not apply at all in quantum physics. Anyone who enters the quantum world practically enters into a completely different world.

For example, a quantum particle can be at two different locations simultaneously. And, as we have seen above, a quantum particle can be both a wave of energy and a substance at the same time.

God is the creator of heaven and earth, also of the quantum world. In fact, He

created the entire universe out of the quantum world, or the quantum world that God created first is the foundation from which He has built the universe.

If we want to talk about the material, physical world and what it consists of, we have to go to the quantum level, into the world of the quarks, bosons, etc. These are the things that make up the physical world.

Sun, moon, stars, the chair on which you sit, your own body and every other matter consists of quantum particles. That means the basic level of all existence is continuously vibrating energy. It is always in motion.

That is why everything has a certain frequency, including our body. Each part of the body again has a different frequency, even our DNA. The interesting thing is that even our emotions, our thoughts and words have frequencies! They can therefore have positive or negative effects.

God has spoken the whole universe into being with His words. God has thought and spoken you and me into existence. He is God, and His thoughts and words create things, they are powerful. If we follow this thought we see that we are created in His image, we are His children. Our words too are powerful, God's word tells us they have power over life and death.

When Jesus lived on the earth, He continually used the abovementioned powers when He healed the sick, stopped a storm, turned water into wine, walked on water, etc. Jesus knew the quantum world. It was not just magic when Jesus did miracles, He did them by applying the laws of quantum physics.

Jesus knew how to control the frequency (the rate of vibrational energy) of matter. So when He did miracles like creating new eyes or healing leprosy, He materialized or transformed matter. That is exactly what quantum physics is.

Quantum physics teaches that the whole material universe came into being out of invisible matter (substance) = quantum substance.

The Bible tells us the same: Hebrews 11:3. Through faith, we understand that the world is created by God's Word, so that everything that one sees (the physical world) was made out of what is invisible (the invisible quantum world).

Jesus continually demonstrated His authority over the material world (stilling a storm, creating or transforming matter like new eyes, multiplying food, healing, changing water into wine etc.). Then He trained His disciples to do the same things and He sent them out to demonstrate it.

Jesus even did this with His own body as He entered through a locked door into the room where His disciples sat. (See John 20:19)

Another time, a group of people wanted to throw Jesus off a cliff, but He walked right through the crowd (as He had walked through the wall), by letting His body disappear into the unseen realm, the quantum realm, and then appearing again somewhere else. (See Luke 4: 28-30)

Philip was transrelocated. (Acts 8:39) This was nothing else than letting matter disappear, or in other words by controlling the particles of His body and taking them into the unseen quantum realm (which operates faster than then one we live in) and letting it instantly appear again in another place.

Jesus walked on water, as did Peter. (Matthew 14:25) Because He understood the quantum world, He could make the water a solid mass by controlling the vibrational frequency of the water, so He could walk on it.

The whole Bible is full of examples from the quantum world, we have just not seen it before. We will hear a lot about it in the days to come, because Jesus said we will do the works He did... and greater ones! For Jesus, that was not magic but an application of quantum knowledge. And by the way, if Jesus were to live on the earth today, He would not use the same parables He used at that time, today He would use parables of the quantum world.

When Mike Parsons was in heaven for the very first time talking directly to God, the first thing the Lord did was give him a long lesson in quantum physics. That shows the importance of it. Mike did not even understand much at first. But in the meantime it is clear to all of us that this is a topic we all need to know, we will hear a lot about in the future and we will apply in a practical way when we do the works that Jesus did!

I personally am looking forward to learning more about these things and to grow to the point of being able to use them when the time is there.

For the sake of honesty I would like to add one more thing. I said above that my spirit was and is "dancing" when I listen to these themes. But at first my soul (or my reasoning) reacted to that and said, "Be cautious, and keep your fingers out of it, this is New Age!" Of course we can go to God and ask Him personally whether that is true. One of the answers He gave is "Of course that is New Age! We are living in a new Era, a new age!"

Figuratively speaking, we have crossed the Jordan and are now in the process of conquering our promised land. We live in a new season, a new era. Something completely new has begun. Now God is ready to reveal all the secrets hidden in His heart. Now the books that were sealed are all open.

God wants us to be hungry for the deep things of the heart of God.

Regarding the truths and practices described above, some Christians would say that the New Age people took it away from us. I do not think so. I believe we have given it

away. The church rejected these things because we were afraid of supernatural things. The New Age people then took it, explored it and practised it in their own way without God.

Now it is up to us, the Ekklesia, the sons and daughters of God, to take back what belongs to us. Let us take back this whole area and use it, applying it in such a way that the earth will be filled with the glory of God!
