

To function in a governmental sonship position we need our identity as sons to come from the Father. We need a cardiognosis, face to face, heart to heart, knowing the desires of the Father's heart. Governmental sonship is reflecting the Father's heart.

As we mature as sons we are given greater levels of responsibility with a wider remit. We all have a responsibility for our own lives, the planet earth and its restoration but there is more to creation beyond the earth, extending to the cosmos and the dimensions.

As we mature or ascend higher we will discover that we have creative abilities far beyond what we could have imagined. We have the ability to live multidimensionally, not just travel to dimensions.

There is a new level of relationship that the Father is inviting us to engage so that we know His heart. Union and oneness are required if we are going to engage creation as sons representing the Father's desire for restoration.

There are other realms beyond our physical dimension. There are portals to those dimensions in the constellations. There is access through the gates associated with the everlasting doors. North, South, East and West gates.

Continuing to share activations and discussions around the topic of the west gate. Portals, doors, gates and windows are neutral. The question is, who is using the gate and for what purpose?

Personally I am not reengaging with this gate on my own. I can engage the realm, and I can engage around the everlasting doors and I can engage the portals and connections, but I'm not going to engage the gateway on my own.

I don't feel this is something anyone should really do on their own unless they have a very clear mandate to do it. It is better engaged together. There are other groups obviously doing this, but they're engaging slightly differently for specific reasons.

There is a sense that oneness and union are really important. When we engaged, we were back-to-back. We were together and able to operate together in it, which I think is really important. Independence can make us vulnerable to deception.

Generally speaking, the things I do associated with this specific gate system are group things. I may go back and have a look myself, but I'm not going beyond that realm, through the gate, or opening it on my own.

At this point I'm going to stick with what we do together but I do engage with 8 groups. So I do think the other gateways also need exploration at some point, because I think we need to understand how the whole system works.

Do you think the gates can be tied to the archangels? I had that experience, I guess, five or six years ago. I wanted to throw that out there to see if there was any connection.

I think there could be all sorts of different levels of connection to many different things. There's definitely a connection with Lion, Ox, Eagle, Man.

There's definitely four assigned guardians.

There may well be assigned archangels to each gate that have a particular function or purpose in that assignment. I don't know.

It is all out there exploration-wise. I'm sure we'll find out a lot more about all this.

I believe that we will eventually have to man the everlasting doors and administrate what comes into the earth.

It's not a question of being an automatic thing. I think its governmental for the sons of God to administrate the everlasting doors correctly.

Therefore, when all these things are starting to reconnect and the planets are coming back into harmony, then this whole system needs to work.

I don't know how that will relate to what's on the earth because what's on the earth has been misused and used for wrong purposes.

Maybe we will have to do something with the pyramids, ziggurats, Stonehenge-type megalithic structures and reclaim them, cleanse them and restore the areas around them.

I think that might be something we need to do before we let anything through.

You wouldn't want to let anything through to reactivate something on the earth which is going to do something negative.

I think there is a degree of caution, that we need to be careful, we take it step-by-step and not do something without thinking through the implications and the consequences.

When this gate was opened before, those that opened it weren't prepared for the consequences and that has negatively influenced the earth.

We want to make sure whatever we do is done circumspectly.

Not with fear but with caution, making sure we understand what we're doing before we jump in with both feet and do it.

That is why Prudence has engaged us alongside Wisdom, Knowledge and Understanding.

Prudence is an angelic being that has helped me navigate my encounters.

Prudence meaning:

- the ability to govern and discipline oneself by the use of reason
- sagacity or shrewdness in the management of affairs
- skill and good judgment in the use of resources
- caution or circumspection as to danger or risk

This is why I think exploration and preparation are important.

It's interesting to me that we're talking about government - not government that is coercive or wants to use power, that's not going to be the avenue that we operate in.

We are operating in a love and forgiveness pattern and it's very important to allow this to function.

I mention this because typically my own motivations, even looking at a list, I want it to come forth from that forgiveness point of view with goodness, and peace and joy rather than any type of "this is how it's got to be" mentality.

I think it does need governing. You don't want to release discoveries and those discoveries to fall into the wrong hands, and then be used or hidden again, which is what has happened before.

I think a lot of that has happened because Christians have stepped out of the academic fields.

They have let others in the science field take over. We need to be sure to reengage correctly. So, if there are things that need discovery, giving me a new source of energy would not be the wisest thing because I would have no idea what to do with it.

Even though I come from a scientific background, I don't come from a technological background. I could be given a schematic to an invention but I would have no idea what to do with it. So it is important that the right people receive the revelation.

So, it's also making sure the people that God is preparing to receive and release things are going to engage these things.

It's not a question of releasing a whole lot of knowledge. I don't think that's the wisest thing. I think we need more wisdom about how we do it.

If we receive things that come on our list, how is that list going to be used and how are the things that are released going to be used.

I think we need to contemplate that. Become more aware that we are responsible for what we're opening and what we're releasing.

How we need to do it needs to be clear. When I look back, I've jumped in before and done things and then realised that it wasn't the best way of doing it.

I think we've got time and I think that was key in this whole thing of preparing, acclimatising.

I want to say something important, the intentions and motives of the heart, and recognising that there are too many things in the hands of a wrong spirit, at this point, in this juncture.

If I look at what the Family's after, it's the healing of the human heart and the soul, the unification of spirit, soul, and body, so that we can manage these things, so that we can release these things.

The end all for the Family is sonship and bringing everybody to that place of re-establishing safety and security.

Getting back to that place where they can be raised up as sons and daughters of God; so whatever is coming forth would be the recalibration of this.

That is so that we can rise up, restore nature and respond back to creation as a whole.

Well, there is certainly plenty to reflect on there and peruse before we get together again.

Let's continue to engage ourselves before we meet again.

If the Father births a desire for something in you, that's where these things can be called forth.

There is something in us that will know what it is that we need to call forth for that manifestation.

I think it's not all for now, although there are things for now and there are things in preparation for the future.

This is also a preparation time for things that are coming for the next seasons.

What do we need?

We have the opportunity to call forth the discoveries from the realm of possibility that we need for our time and for the next season.

Energy?

Transport?

Food?  
Health?

This is another government group engagement with the west gate that has similarities and also some differences that are explained by the fact that there are different people involved and that the individual groups have specific mandates.

We engaged a gateway, the west gate, which is related to the realm where the everlasting doors are situated and we found the realm beyond the west gate when we were allowed to open it. We weren't allowed to go through it but we were able to observe and engage that realm.

Wisdom has engaged quite a lot with us. In our last meeting, wisdom said this is "the realm of possibility": one of the things we were directed to do was to make a list of things and discoveries that are necessary for the days ahead, that we could call in to being.

Out of engaging with the Father's heart, what are the things we need?  
If we are going to see discoveries/inventions/truth and revelation, we must make sure it does not fall into the wrong hands, as then it's likely to get suppressed or used for the few and not the many.

What do we need in our generation to come to a place of restoration and bring everything back into harmony and balance, to restore the whole planet, all people and beings?

The realm of possibility was connected to the house of discoveries, which was one of the chancellors' houses, for things that we really need to engage the heart of Father about.

We need the right people, for example, to steward new energy sources.  
We need people that understand this to come forth, those that we can trust.  
We need people that God can entrust with knowledge for the creation of things.

We need the right people to use the discoveries for the benefit of all, not just a few, so the whole planet could be free from the effects of negative sources of energy.

What are the answers that are already here? For example natural solutions, e.g. bacteria that can break down plastic etc.  
Every good/witty idea comes through Prudence and Wisdom down to mankind, it rains on the just and the unjust, but man can create for good or evil.

We should assign angels to protect inventors from the seduction and control of the enemy's influences  
This process is all step by step, so we don't make false assumptions, but there do need to be strategies in place.

There are frequencies associated with the solar system, generated by each of the planets, that are designed to bring balance and replenishment to the earth.  
How do those frequencies come from the planets in our solar system to the earth?

The production of planetary frequencies cannot just come through space, as there are belts of ionizing radiation that would cause interference; but there is a way that relates to planetary doors, the west gate and the everlasting doors.

There are gates beyond the western gate that are designed to allow frequencies to come through, that activate the west gate and can then go through the everlasting doors to engage the earth.

Their original purpose was to connect heaven, earth and all dimensions to bring balance to the whole creation.

4 angels engaging with us: Wisdom, Knowledge, Understanding and Prudence, who helps with the right heart, right attitude and right motive.

Being prudent is an important part of this process

It's not just about opening those gateways, since they are also 2-way gates that are designed for communication and for travel.

How did they work originally?

What was on the earth connected to these gates, were there places aligned to the N. S. E. W. and how did they function?

How did the original places use the frequencies?

Is there residual energy left on the earth that has drawn people to those areas?

How have those areas been subsequently misused?

Are there ley lines of residual energy that are connecting some of the structures like pyramids, ziggurats, and other megalithic structures that are man's Babel-like counterfeits?

I believe that those structures were built using light and sound, especially sound that opened gateways; and material was moved through those gates.

This gateway technology was like wormholes that connect two places in space.

If Adam and Eve had continued to live and filled the earth, there would be so many people that we would have had to go to other places.

There is no end to the increase of God's government and peace: they would have colonised other planets.

How would they get there?

Space ships? Probably not, but using what God had already put in place.

Maybe through the gateway technology.

Some sci-fi was and is very prophetic.

The timeline is also a tool, the event horizon to change things, moving outside time, back and forth through time.

Technically the event horizon is the plane that separates realms on the face of a wormhole.

They don't know what's beyond the wormhole.

There could be a time element beyond the wormhole. (movie: Interstellar)

Within the Merkabah of my being there are portals that connect me to multidimensional realities; my soul and spirit travel through them.

Pray for those that come after us for protection for them as they will see more than we will.

God's desire is that generations will be working together, therefore we need to operate in immortality.

We were warned that the west gate has been used in ancient history to bring illegitimate knowledge on the earth.

There is a Luciferian agenda behind these dimensional incursions to establish a one world counterfeit government.

There were civilisations established on the basis of the knowledge that came through these gates.

That knowledge was traded for with the watcher angels who also used the west gate to do what they did.  
Genesis 6 - Nephilim.

The Sumerians were one such civilisation that just sprang up; they had advanced knowledge of the constellations, and they used 6 as numerological base.

What is it 6 about?

110 in binary is 6. We still use 60 minutes, 60 seconds, 360 degrees.

The warning is: make sure you do not trade for knowledge like the Sumerians did.

Knowledge from God is offered freely.

If there is a trade offered, it's not coming from God: we need to be careful that we do not accept or receive something through trading.

Make sure that what we receive has the hallmark of love and God's frequency on it.

Some people may be offered information or knowledge which could be designed to corrupt or trap them: we need to be prudent.

I met Prudence in 2012: she gave me 7 navigational tools (symbolic of a way of discerning which way to go) to navigate the heavens

Helping me to use the right way of understanding and to use the right methods to access and engage.

It is important to only use what we have been given rather than trying to discover something ourselves.

We need to be prudent and careful but not fearful when we explore new places and see new things.

6 is the Hebrew letter *vav*, connection of heaven and earth, the number of man

3, 6, 9: Nancy talks about all of creation being formed from 3, 6 and 9

Tesla talked about the importance of 9 in understanding frequency.

6 has been called the number of man in independence and it has been associated with the tree of knowledge of good and evil, where man has made substitute things ourselves that are less than God's intentions - but is there a righteous real?

6, as the number of man, is often seen negatively. Why should we see it negatively? We are the connection between heaven and earth, we are the number 6,

We are the convergence between time and eternity, that is the role of the sons.

Before the fall, when the everlasting doors were open and the planets were in union, how did those frequencies form the energy fields that brought replenishment and life to the earth?

What did man do to try to counterfeit those fields/structures?

They may not have been physical structures, but some points on the earth that received frequency and created the fields of energy that we were to live in and bring health and wholeness.

The counterfeits of those structures were designed to be receivers of frequency, to control those frequencies, but it was negative. As a result the systems of the solar system were all shut down and these gateways have been shut down.

So they tried to reconnect them in the wrong way, which is what the Tower of Babel was all about, trying to reach into the realm where the west gate was and where the everlasting doors were and connect dimensionally in a wrong way; and it formed connections that have created havoc throughout the dimensions.

So there was God's original and then subsequent to that, all the counterfeit structures got built on the basis of that knowledge, perfectly aligned to N, S, E, W, to be receivers, waiting for the everlasting doors or the dimensions to release frequencies that would then create fields on the earth again.

The earth shield is protecting the earth from the negative influences trying control the earth. Some of it has happened when the western gate was opened, and some of the things that have happened subsequently have been spread around the earth in an illegitimate way.

There was an energy field designed to create health and wholeness, replenishment, fruitfulness and all the positive things that God intended us to live in harmony with.

At one time there was a single land mass on the earth (Pangea): in terms of interaction with frequency coming from other planets, was that part of the original design?

I believe the world will be reunited and we will have one land mass again, because that was God's original intention: that's how it was created, and it will be restored, as all things will be restored.

How does that affect the rotation of the earth and poles?

We are off-axis: maybe we will be restored to right axis?

As we mature, we are receiving more knowledge.

They couldn't handle the illegitimate knowledge, and every civilisation that had that knowledge imploded.

We want the kingdom of God to be filling the earth with peace.

Some boundaries are good boundaries but then they become laws, which creates rebellion.

So relationship is what brings the boundary because you know the heart of God and you wouldn't want to do anything contrary to the heart of God which is the heart of love.

Unfortunately, mixed in with that has been man's interpretation: which has been laws and rules to control people into following the boundaries due to fear, rather than motivation out of desire because of love.

That is the difference between religion and relationship.

God's kingdom is a kingdom of love, which brings peace; and there is no end to the increase of His government.

Engagement time: we engage You heart to heart, face to face; our desire is to know Your intentions  
We thank You for this privilege of being involved in the unveiling of your kingdom and your purposes.

I was in front of the western gate with Jesus, multi-coloured path, very large angels guardians, union and blessing, went to garden with presents, golden box with a key inside, came to a door, the key was for that door.

"Command ye my hand" outworking the way God does things

It will always be a hand of love that is the basis of everything we should be doing.

Treasure chest open, gold, jewels, "what do You treasure, Lord?"

Life, love, peace, wholeness, honesty, humility, inquisitiveness, wonder, mercy, creativity, generosity, cooperation, selflessness, contentment, patience...

The heart attitude that is necessary and these are our guidelines.

What is the heart? the intent of why you are doing this, this is how to administrate.

We would be guarded by peace, truth and love; they would protect us.

Triangle formed a 3D triangle and kept growing.

- "space: the final frontier"
- "the heart of man is the final frontier"

When they corrupted and harnessed the energy source in the past their hearts were not pure, so they were using that energy for greed and warmongering and power: those things came through the gates.

How do we change from a heart of stone to a heart of flesh?

We need that new heart to be able to administrate what is coming through the gates.

We need that circumcision of the heart; we died with Christ to have a pure heart that can handle this power so it won't be corrupted.

That list of heart attitudes: they are tangible energies and frequencies.

Is that what needs to be mined from the western gate?

We become the conduits?

Whatever comes through needs to travel on those frequencies.

*USS Enterprise* ship in the cosmos, we are the epicentre by which God is engaging the earth, head expanding beyond the enterprise, we are little gods. I saw rings around a spherical body: earth? Saturn?

Moved by Father's love, this must be the total motivation and substance, the earth shield is connected with that, bringing about the arms of God through this shield around the earth.

The transport modalities like the west gate are going to be experienced by us as we arise, shine.

The glory of God filling the earth as sons arise.

I have engaged the west gate with groups many times now, and each time there is something new that is discovered.

We have observed and looked through the gate to see the doors on the other side.

I have not been through the gate personally as yet; neither have the groups that I have engaged with.

We would need a specific mandate for that.

I would not advise anyone to assume you have access without an executive order.

The west gate engagements were late 2021 and early 2022.

Although this section is in module 10 there are 2 other modules that I have taught.

Those modules describe the ongoing process that I have been through to bring me to a mature state.

Becoming a mature son is a long process, receiving knowledge, wisdom and understanding concerning many things but it is vitally important that we also have prudence.

Prudence is a being that helps us to be prudent in our use of knowledge.

With great knowledge comes great responsibility to use it wisely.

We must be careful we do not try to run too fast too quickly.

We are on a journey of discovery, not in race to finish first.

Please be careful and prudent in the use of the knowledge I am releasing.

I am sure there will be many more discoveries of the heavenly and dimensional realms that are connected to our governmental and creational sonship abilities that will be revealed.

Seek and pursue by desire to engage these realms as led.

All of creation has its eyes fixed, looking for true sons to be revealed.

Will you be one of those sons?

Will you accept the call?

Will you embrace your destiny?

Will you accept the responsibility?

He is calling for the sons of God to arise.

Let's engage and ask the Father to show you what you need to see right now on your journey.

Rest is the key to restoration, revelation and creativity.

Start to focus on your breathing, slowing it down, and start thinking of the name of God, YHWH.

Be still and know that I am God.

I am love, I am joy, I am peace.

Invite love, joy and peace to flow in you and through you to create an atmosphere of rest around you.

You are in a safe place.

Start to think of an open heaven and set your desire upon engaging wherever the Father takes you.
